UNDERSTANDING JSP

01. Develop a JSP application to display access count of the webpage using sessions

CODE:

```jsp
<%@ page language="java" contentType="text/html; charset=UTF-8" pageEncoding="UTF-8"%>
<%@ page import="java.util.*" %>
<!DOCTYPE html>
<html>
<head>
   <title>Page Access Counter</title>
</head>
<body>
   <%
      Integer accessCount = (Integer) session.getAttribute("accessCount");
      if (accessCount == null) {
         accessCount = 0;
      }
      accessCount++;
      session.setAttribute("accessCount", accessCount);
   %>
   <h1>Page Access Counter</h1>
   <p>This page has been accessed <%= accessCount %> times in this session.</p>
   Go to Products Page: <a href="accessPage.html">Go to Products Page</a>
</body>
</html>
```

OUTPUT:

Page Access Counter

This page has been accessed 3 times in this session.

Go to Products Page: [Go to Products Page](#)
